Our scissors are made from a premium quality stainless steel through hot drop forging method, which gives the instrument a sturdy formation and nice profile. The assembly consists of machine-Made screw for smooth and frictionless operations. The surface finish gets the final out look after multiple grinding, polishing and cleaning processes.

Available in following finishes:

Matte
Satin
Sand blasted
Gold plated completely or partially
Partially color coated

Cuticle / Nail Nippers

All nippers are completely hot dropped forged from stainless steel in two categories:

- 1) Lap joint
- 2) Box joint

Each end is machined and milled for perfection during assembly, which is then aligned to prevent slipping of the cutting tips. The angle of instrument is designed to make low force cutting functions.

Available in following finishes:

Matte
Satin
Sand blasted
Gold plated completely or partially
Partially color coated
